

OPTIMIZING YOUR LOGISTICS PERFORMANCE

REAL OPERATIONAL & SOFTWARE ISSUES FACED IN YOUR INDUSTRY

1

Unproductive labour and a fall in profit margins

2

Complicated and out-of-date warehouse processes that reduce efficiency

3

Operations management control mechanisms ineffective, leading to bottlenecks in inbound and outbound workflows

4

Rigid applications. Difficulty keeping up with ever-changing business requirements. Expensive to change, with long lead times

5

Maximum data input, minimal useful outputs – lack of real time information visibility

6

High maintenance costs, low value return. Expensive annual maintenance supporting out of date technology

HOW CAN WE HELP?

▶▶ Reduce your labour costs:

Labour is expensive. Software that is intuitive and easy to use will reduce your inbound and outbound processing times. That means less labour and happier customers.

▶▶ Simplify your processes:

Stop the work-arounds. Infolog is designed to support your key operational process within our single application platform.

▶▶ Don't react. Predict:

Finding a problem after the fact takes time and expense to remedy. Our unique workflow processes and analytics will alert operations of potential issues, before they happen.

▶▶ Change is constant:

Our Infolog WMS is highly adaptable to changing business requirements. Changes required are delivered quickly, backed up by our Quality Assurance process.

▶▶ Critical operations information real time:

We provide users with complete process visibility through our dashboards and reports.

▶▶ ROI not dead-end investment:

We utilize the latest technology to ensure you stay ahead of your competitors.

WHO WE ARE

Infolog is an Independent Software Vendor (ISV) with a singular focus on the Supply Chain & Logistics Industry.

Presence in over 6 countries. Over 150 Implementation sites. Multilingual Support

Expert in WMS, HMS, TMS and OMS. Integrate seamlessly with ERP. Microsoft Dynamics, SAP, Oracle, Acumatica, etc

Operational offices in 6 countries with team size of 50. Growing as we support complex, successful projects in multiple regions

We believe simplicity leads to increased productivity. We help our customers take their businesses to the next level with our innovative and easy to use software, by infusing leading edge technology into our innovative Warehouse Management System & Transport Management System.

“Simply put we are all about increasing productivity.”

Key to our ease of use vision is our emphasis on visual content for every type of user. Infolog provides each team member, from Order Picker to Managing Director the real time information they need. The result is streamlined workflows, exceptional accuracy and superior information visibility.

“

“We are confident that with their enthusiasm and ability to understand client’s requirement, Infolog will be able to continue to deliver their commitment to their clients.”

Toh Hui Leng, CEO of Grocery Logistics of Singapore Pte Ltd (GLS)

I am glad that we have chosen Infolog to work with us as they possess the capabilities and flexibility to deliver the change requirements at a rapid pace with quality.”

Dennis Png, Deputy Managing Director of WLNA

“As an e-Commerce business, one of the major challenges is that our business never sleeps. With a business running 24x7, Infolog has managed to provide a superb support experience at unprecedented levels!”

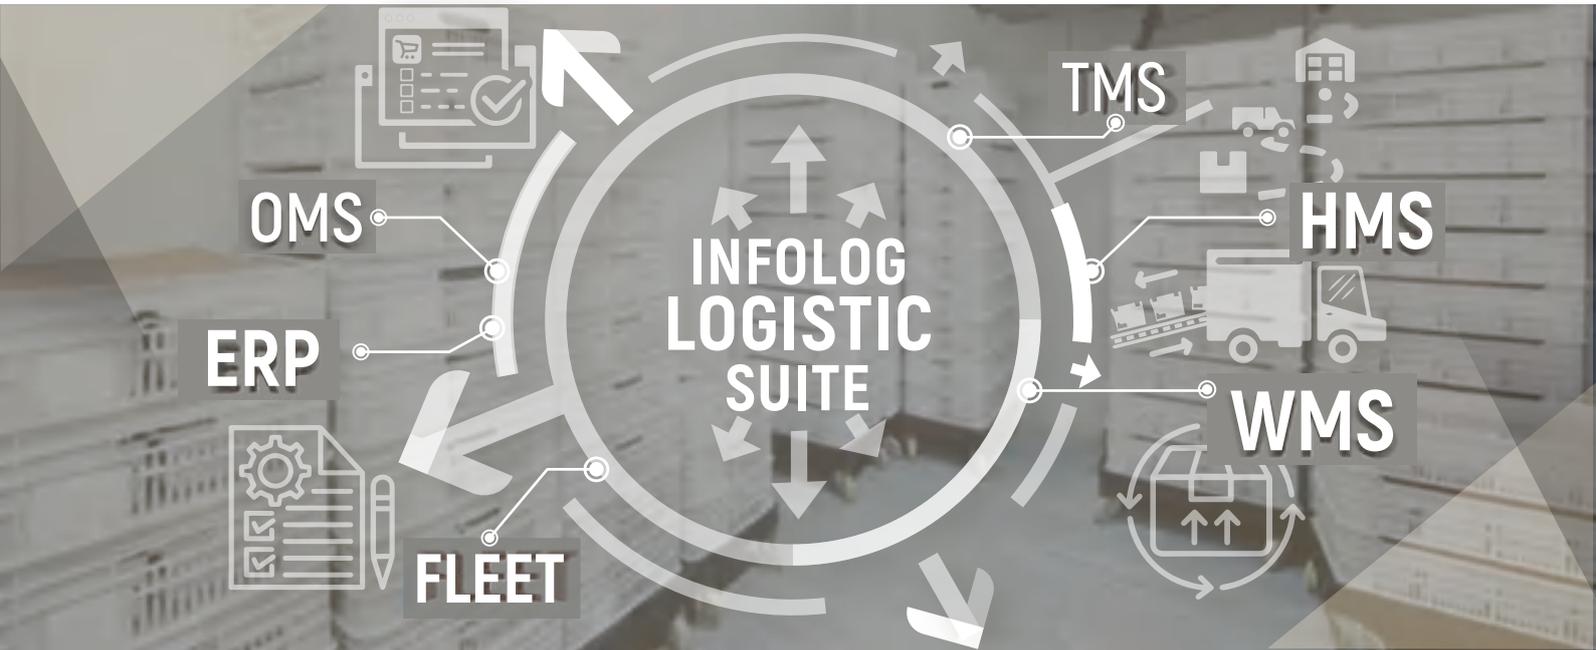

Samuel Lim, CEO of Reebonz Ltd

“The commitment from Infolog team has impressed us during the implementation cycle. Due to the tight deadline, we needed the WMS to be up and running in less than 2 months’ time. Infolog fully fulfilled their promise of timely delivery and also implemented their WMS in ways that had exceeded all our expectations!”

Ms Phuong, CEO of ACFC Co Ltd

”

WHAT WE DO

WMS Warehouse Management System

Future Proof Your Operation with Our Modern WMS Technology

We put our decades of supply chain and logistics industry experience to use when we designed Infolog WMS. The result is an enterprise WMS ready for ever changing logistics environment, designed with the end user in mind.

GET RID OF PAPER: All the functions your team needs to execute tasks on the warehouse floor are included with our RF application suite

IMPROVE ACCURACY: Infolog's sophisticated algorithms select the most efficient locations for product put away and order selection while maintain product rotation rules

GET THE RIGHT INFORMATION: Infolog Business Intelligence reports the information your people need, real time in a user-friendly format

MORE TASKS PROCESSED: Efficiently assign work to your team and monitor progress. Our easy to use applications means more throughput with the same headcount

SEAMLESSLY CONNECT: Integrate your ERP and automation solutions such as Voice Picking, Pick-to-Light, Robotics and more

FEATURING:

- Advanced Shipment Notification (ASN)
- Expected Receiving & Blind Receiving
- Inventory Status Management
- Repacking
- Loose Picking & Replenishment
- RF Handheld Barcode Scanner Module
- Tracking of Expiry Date, Batch No/Lot No, Serial Number, Vintage, Color, Size, Model, etc
- Dynamic Allocation Type for Picking
- Picking Strategy & Pick Path Management
- Putaway Strategy
- Cycle Count
- 3PL Activities Billing
- Bonded Warehouse & Reporting for Customs
- Graphical View of Warehouse Layout
- Document & Image Files Management
- Support for Multiple Entities, Ownership and Multiple Languages

HMS

Haulage Management System

Simplify Container/ISO tank Trucking Operation Management

STOP PAYING FOR EXCESS TIME: Infolog alerts you to potential overages

PROCESS PROTECTION: All documents, from driver insurance to signed delivery notes are kept in the Infolog database for security and easy retrieval

GPS TRACKING: Always know where your team is

FEATURING:

- Long/Short Haul Container/ ISO Tank Trucking
- Prime Mover Tracking
- Billing and payment calculations

RESOURCES SETUP

- Driver, Vehicle, Trailer, Container, Equipment setup
- Driver Incentive Setup

CUSTOMER, LOCATION, SYSTEM SETUP

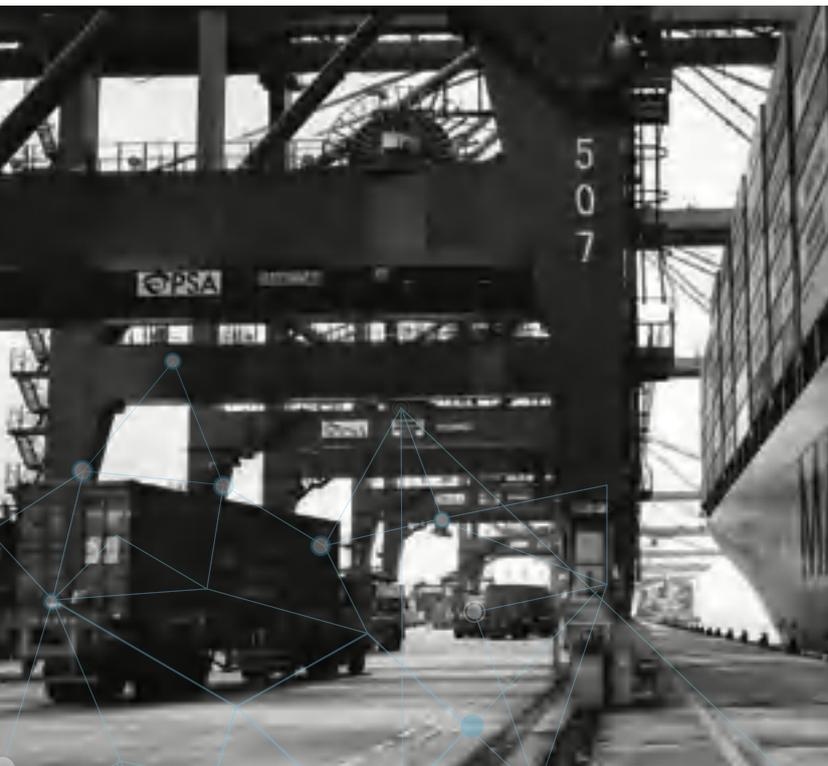

- Premise, Premise type setup
- Delivery Route, Delivery Zone setup
- Customer master, Customer Category, Customer Group setup
- Owner master, Owner Location setup
- Location setup
- Contract setup
- Port/Agent setup
- Service Template setup
- Trip Template setup

OPERATION

- Job Order Entry
- Transport Planning
- Driver Tracking
- Prime Mover Tracking

REPORTING

- Driver Incentive Report
- Driver Leave Report
- Job Order Report
- Job Order Tracking
- Job Order Charges Report
- Driver Payment Receipt Tracking

TMS

Transportation Management System

Simplify. Optimize. Deliver excellence

Our Dock Management tools ensure both Transport & Warehouse personnel have access to real time inbound and outbound information in all modules. The result: No over-crowded shipping docks or missed delivery times.

OMS

Order Management System

Centralized Order Management. Centralized Billing Management.

Our OMS handle your order receipts of all inbound and outbound orders. Order Splitting to different departments. Customer and Vendor contract management. B2B Billing connector to accounting system.

WE SUPPORT YOUR INDUSTRY

Infolog supports a wide range of industries such as F&B, Electronics, Chemicals, eCommerce, Fashion, Temperature-Controlled Storage, Retail Distribution, Haulage and more.

Product Quality and Customer Satisfaction is at the core of our values. We believe that quality products and happy customers are key success factors in Infolog's continuing growth.

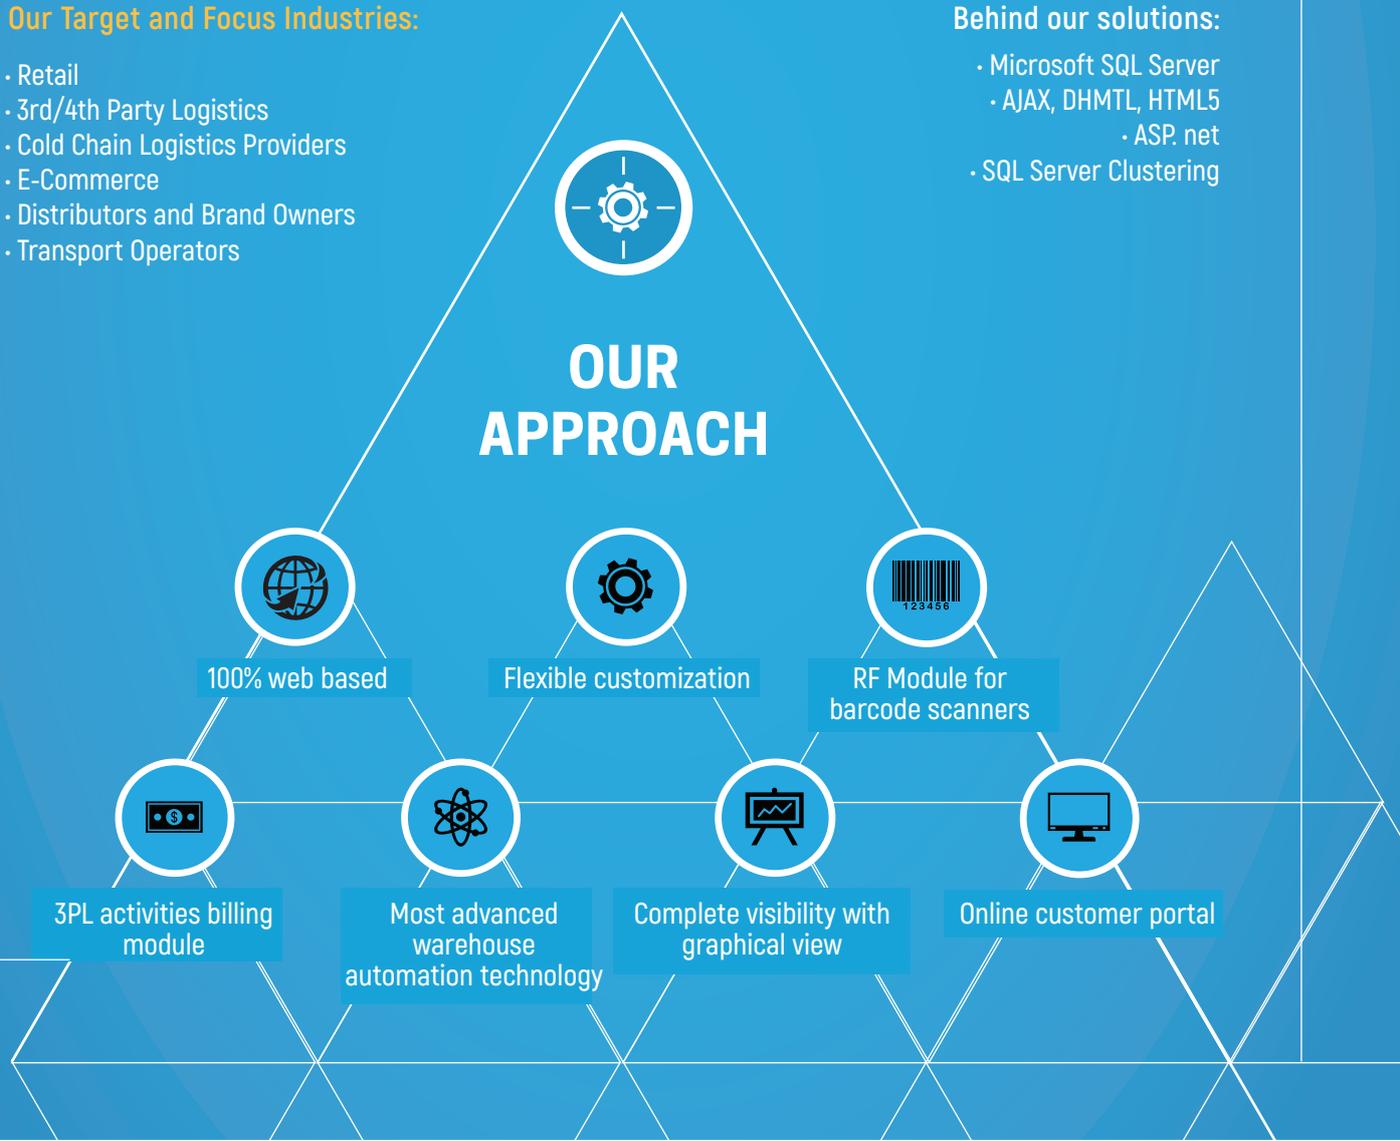

Our Target and Focus Industries:

- Retail
- 3rd/4th Party Logistics
- Cold Chain Logistics Providers
- E-Commerce
- Distributors and Brand Owners
- Transport Operators

Behind our solutions:

- Microsoft SQL Server
- AJAX, DHMTL, HTML5
- ASP. net
- SQL Server Clustering

OUR APPROACH

AUTOMATE YOUR OPERATIONS

Infolog is the heart of your automation solutions

Why?

Aging populations in many markets will only increase labor scarcity

More efficient use of existing infrastructure. Increased throughput in your current facilities.

**Official Distributor of
Geek+ Robotics**

We seamlessly integrate with best in breed automation solutions and provide superior information visibility on a single application platform

Simplify Your Logistics and Supply Chain by Leveraging Best Technologies, such as Goods-To-Person AGV, Moving System AGV, Voice Picking, RFID and more with Our WMS Seamlessly Integrated to your ERP!

Significant productivity gains:

- Not uncommon to triple productivity per FTE
- Improved process visibility inherently improves productivity
- Some automation solutions are highly configurable, accommodating rapidly changing requirements

Improved accuracy:

- Reduced order fulfillment errors
- Overall location level inventory accuracy improvements

Very tight labor markets:

- Scarcity of human resources
- Reduced employee retention, increasing training budgets
- Upward pressures on wages and benefits

Geek+

Automated Guided Vehicle
- Robotics Technology

Primary solutions:

- Order picking
- Order packing
- Replenishment

Key benefits:

- Triples productivity per FTE, reducing headcount
- Fast (3 month) implementation
- Reduced human intervention increases reliability and predictability
- Virtually error free order picking and packing
- Includes advanced slotting tools that keep product storage at a maximum level of efficiency in the warehouse
- Highly configurable

Honeywell

VoCollect - Voice Pick
Technology

Primary solutions:

- Order picking
- Order packing
- Cycle counting
- Put away

Key benefits:

- Hands Free & Focus Free
- Increase productivity up to 30%
- Easy real-time integration with Infolog

- Rapidly deployable / Multilingual
- Highly effective with any type of product, from pallets to pens
- Highly configurable. Supports rapidly changing environments
- Simple end user training
